

WinS Journey of the Philippines its impact on the global WinS movement

Bella Monse,

Senior Advisor, GIZ

**FIT FOR
SCHOOL**

2007: Piloting Essential Health Care Programm

Starting group hygiene activities

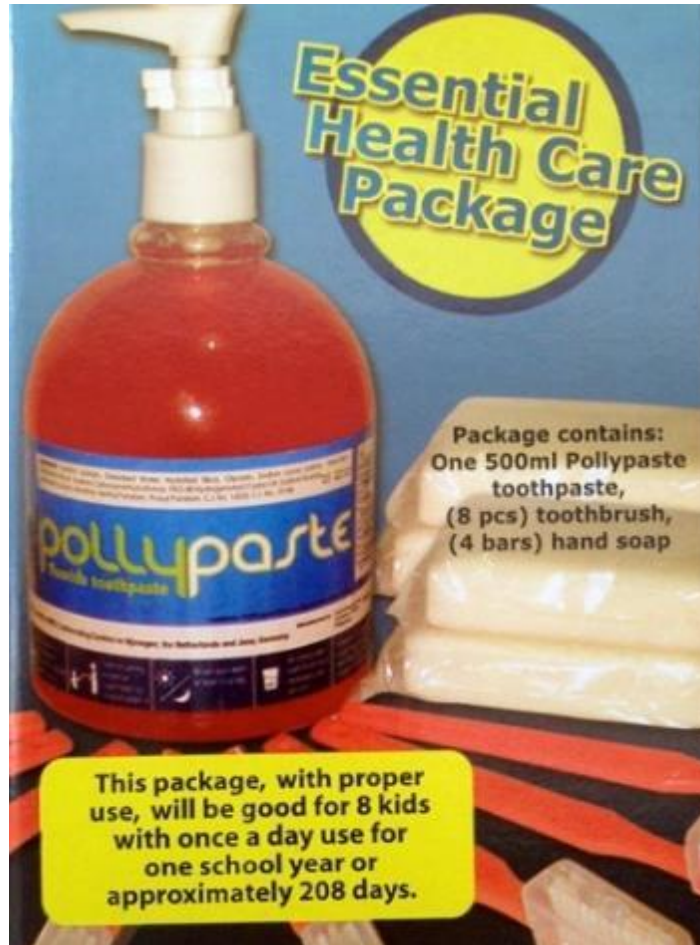

2007: EHCP as a DepEd flagship program

EHCP Orientation by SDS to School heads

2008: Development of EHCP package

The packaging is in clear PET bottles with pump dispensers that releases the right amount of toothpaste (0.27 - 0.3 ml) for each pump. This will provide greater control of usage and is more economical.

Pollypaste contains the right amount of soluble fluoride (1,450 parts per million) as recommended by the World Health Organization (WHO) to effectively prevent dental caries.

"Pollypaste is quality tested at the World Health Organization (WHO) Collaborating Centres in Nijmegen, Netherlands and in Jena, Germany."

hydrated silica, glycerine, sodium lauryl sulfate, carboxymethyl cellulose gum, spearmint sodium saccharin, PEG 40 hydrogenated castor oil, sodium fluoride, propyl paraben, colorant, deionized water, 1,450 ppm free available fluoride at time of manufacture

2008: Lobbying for support from LGUs

Oct 15, 2008: First ever GHD – Philippines
at center stage

.....

2008: fine tuning implementation details

School Health Summit: EHCP in all regions

Involvement of parents in systematic manner

2011: Sec Luistro at WWW Stockholm - WinS is the responsibility of the Education Sector

2012: 1st International Learning Exchange in Iloilo

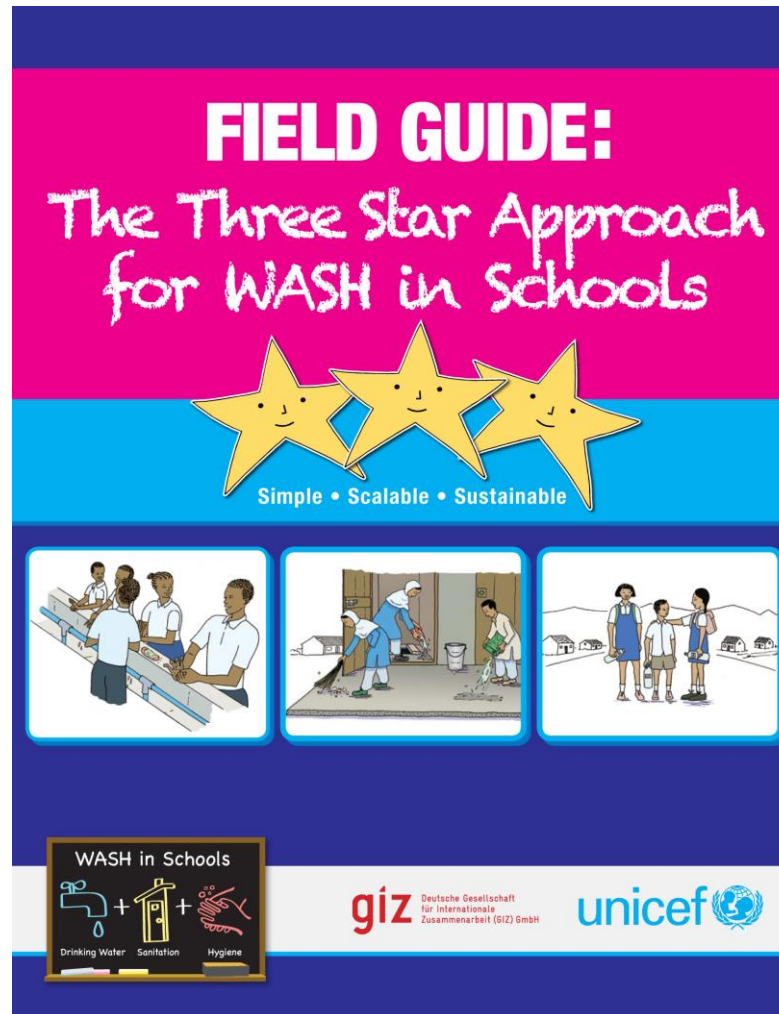

2013: LE in India – Group handwashing prior to Mid Day Meal (MDM) as national policy

2013: Group Handwashing as core intervention for UNICEF WinS programming in 88 countries

2013: Three-Star Approach for WASH in Schools

THREE STAR CRITERIA

2016: 5th ILE in Jakarta / Indonesia

2016 during ILE: Launch of SDG indicators for Wins

Drinking water

Sanitation

Hygiene

Advanced service

Additional criteria may include quality, quantity, continuity, and accessibility to all users

Advanced service

Additional criteria may include student per toilet ratios, menstrual hygiene facilities, cleanliness, accessibility to all users, and excreta management systems

Advanced service

Additional criteria may include hygiene education, group handwashing, menstrual hygiene materials, and accessibility to all users

SDG Target

Basic service

Drinking water from an improved source is available at the school

Basic service

Improved facilities, which are single-sex and usable at the school

Basic service

Handwashing facilities, which have water and soap available

Limited service

There is an improved source (pipled water, protected well/spring, rainwater, bottled water), but water not available at time of survey

Limited service

There are improved facilities (flush/pour flush, pit latrine with slab, composting toilet), but not sex-separated or not usable

Limited service

Handwashing facilities with water, but no soap

No service

No water source or unimproved source (unprotected well/spring, tanker-truck surface water source)

No service

No toilets or latrines, or unimproved facilities (pit latrines without a slab or platform, hanging latrines, bucket latrines)

No service

No handwashing facilities at the school or handwashing facilities with no water
